UNDERWATER ROV RENTAL & INSPECTION SERVICES

Underwater ROV Rental & Inspection Services Powered by the Blueeye X3

SCS delivers agile, high-resolution underwater inspection services using the Blueeye X3 remotely operated vehicle (ROV).

Designed for rapid deployment, precision data capture and cost-effective operations, the Blueeye X3 enables safe, efficient inspections across critical marine and freshwater environments.

From water utilities and reservoirs to ports, offshore energy and aquaculture, our ROV services provide actionable insights without the risk, cost or downtime associated with larger ROVs and traditional diver-based operations.

Why Blueeye X3?

The Blueeye X3 is a compact, professional-grade ROV engineered for demanding inspection tasks in confined, shallow or complex underwater environments.

Key capabilities include:

- **High-definition video** and still imagery
- **Live video streaming** for effortless remote sharing of underwater inspections in real-time
- **Autonomous navigation** enables mission planning follows pre-set waypoints, dive to target depths, geo-tag target locations
- **No bulky topside** - vehicle control and video are dealt with wirelessly for pilot safety and comfort
- **Power and precision** for manoeuvrability and station-keeping
- **Integrated payloads** enable work enabling sensors and instruments for multiple tasks
- **Battery powered** for ease of deployment and minimal footprint
- **Rapid mobilisation** with minimal logistics supports a lower carbon approach to inspection activities, aligning with ESG objectives.

This combination delivers fast, repeatable and auditable inspection results, supporting condition assessment, maintenance planning and regulatory compliance.

Underwater Inspection Services

Aquaculture

- Net integrity and mooring inspections
- Cage structures and seabed condition
- Biofouling monitoring and environmental observation

Benefit:

Improve stock welfare, reduce losses and maintain regulatory compliance.

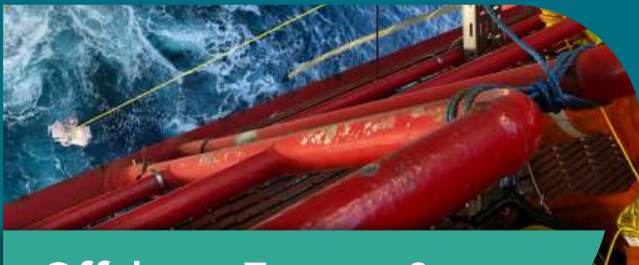

Water Utilities & Reservoirs

- Dam walls, intake structures and outlet works
- Valves, screens and pipework inspections
- Sediment build-up, scour and structural condition assessment
- Non-intrusive inspections without draining assets

Benefit:

Minimise service disruption while maintaining asset integrity and safety.

Offshore Energy & Subsea Infrastructure

- Near-shore and shallow-water subsea assets
- Cables, pipelines and protection systems
- Structural and visual inspections for wind, oil & gas and emerging energy sectors

Benefit:

Flexible ROV deployment for early-stage inspections and ongoing asset monitoring.

Ocean Sciences & Environmental Monitoring

- Habitat and seabed surveys
- Environmental baseline and monitoring studies
- Research and academic support operations

Benefit:

High-quality visual data with minimal environmental disturbance.

Ship Hull Inspections

- Hull, propeller and rudder inspections
- Pre-charter, in-service and post-incident surveys
- Biofouling and coating condition assessment

Benefit:

Cost-effective alternative to dry-dock or diver inspections, with fast turnaround.

Ports & Harbours

- Quays, jetties, piles and berthing structures
- Seabed condition and debris surveys
- Fender systems and mooring infrastructure
- Post-incident and routine condition inspections

Benefit:

Rapid inspections to support safe operations and reduce downtime.

ROV Rental Services

SCS offers the Blueeye X3 as a rental asset, available with or without an experienced pilot.

Rental options include:

- Short-term and long-term hire
- Standby vehicle
- Integrated sensors and instruments
- Training and mobilisation support

Ideal for:

- Utilities operators
- Research organisations
- Engineering consultancies
- Port authorities
- Contractors requiring rapid ROV access

An Alternative to Diver Inspections

Using the Blueeye X3 allows clients to:

- Reduce health & safety risk
- Lower inspection costs
- Access confined or hazardous spaces
- Capture repeatable, high-quality digital records
- Make faster, data-driven decisions

Why Subsea Commercial Services

- ✓ **Operational expertise** across marine and subsea sectors
- ✓ **Modern ROV** assets maintained to professional standards
- ✓ **Flexible service** delivery tailored to project needs
- ✓ **Rapid response** capability for planned and reactive inspections

To discuss inspection services or ROV rental solutions, contact our team to explore how the Blueeye X3 can support your underwater inspection requirements.

Inspect your underwater assets within minutes. Save both time and cost with Blueeye underwater drones.
